DETAILED ACTION

1. The claims 1-19 are pending in the instant office action.

Restriction

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-3, drawn to method of selection of E. coli strain.

Group II, claims 4-16, drawn to E. coli strain.

Group III, claim 17, drawn to process for the preparation of enzyme using the E. coli strain of group II.

Group IV, claim 18, drawn to process for the preparation of chemical compound using the E. coli strain of group II.

Group V, claims 18-19, drawn to process for the preparation of chemical compound using ammonia lyase.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1652

Technical feature of Group I, III, IV and V are method steps. Groups I, III, IV and V do not share same technical feature because method steps in these groups use different products and results different outcomes.

Though group IV uses the product of group II they do not share same technical feature because group II product can be used in other process having different technical feature such as to produce enzymes in group III.

Furthermore, the technical feature linking groups I-V appears to be that they all relate to the stress resistance E. coli strain of group II which does not constitute a "special technical feature" as defined by PCT Rule 13.2, because it does not claim a feature, which defines a contribution over the prior art as this type of E. coli strain is taught by Kenkyusho et al. (JP pat 8-140671, Abstract)

4. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
